## DETAILED ACTION

## EXAMINER'S AMENDMENT

 An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Eric G. King (Reg. No. 42,736) on 02/12/2009 and 02/20/2009.

The application has been amended as follows:

6. (Currently Amended) An apparatus comprising:

a hardware security machine configured to secure exchanges between a client machine and a server machine of a computer system, wherein a first protocol used between the client machine and server machine is a non-secure stateless protocol, and a second protocol implemented between the client machine and said security machine is a secure stateless protocol, wherein said security machine further comprises an analyzer configured to insert an unmodified certificate received from the client machine using said second secure stateless protocol into a cookie header of an HTTP or equivalent request, and further configured to transmit to a server

said unmodified certificate contained in said cookie header using said first non-secure stateless protocol; and wherein said cookie header of said request includes a plurality of cookies; transmitting said unmodified certificate from the client machine to said security machine using said second secure stateless protocol; inserting, said certificate unmodified into a cookie header of a request in the first non-secure stateless protocol, the inserting being done by the analyzer;

## 7. (Currently Amended) A system comprising:

a client machine:

a server machine; and

- a <u>hardware</u> security module interposed between the client machine and the server machine and provided in communication therewith;
- wherein the client machine and the server machine are configured to communicate using a first protocol, said first protocol comprising a non-secure stateless protocol;
- wherein the client machine and the security module are configured to communicate using a second protocol, said second protocol comprising a secure stateless protocol; and wherein the security module comprises an analyzer configured to insert an unmodified certificate sent by the client machine into a cookie header of a

request in conformance with said non-secure stateless protocol, and wherein the analyzer is further configured to transmit to a server said unmodified certificate contained in said cookie header using said non-secure stateless protocol, said cookie header of said request including a plurality of cookies;

transmitting said unmodified certificate from the client machine to said security machine using said second secure stateless protocol;

inserting, said certificate unmodified into a cookie header of a request in

the first non-secure stateless protocol, the inserting being done by
the analyzer;

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to CHINWENDU C. OKORONKWO whose telephone number is (571)272-2662. The examiner can normally be reached on MWF 2:30 - 6:00, TR 9:00-3:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nasser Moazzami can be reached on (571) 272 4195. The fax phone Application/Control Number: 10/053,703 Page 5
